

Mudjatik Thyssen Mining shares our dream.

Imagine a world where the mysteries of the brain and spinal cord are unravelled. It's a dream within our reach.

Thanks to one of Canada's leading mining contractors, funding is in place to help those who suffer from Parkinson's disease, mental illness, stroke, tremors, mood disorders, or brain injury as a result of motor vehicle accidents.

Mudjatik Thyssen Mining is investing \$250,000 in a clinical research professorship devoted to neuroscience.

New research will allow doctors to further understand an area of medicine that touches people at all ages and stages of life.

Will you join us?

You can support the dream by giving to the Royal Care Campaign. Help us make a difference to the health of your province, your loved ones, and you. It's time to become part of the vision.

**ROYAL CARE**
Living the vision.
